

Quan Vo Dinh Minh

Intern - Frontend Engineer

👤 Profile

As a third-year Information Systems student, I am eager to apply my knowledge and skills in full-stack development through an internship opportunity. I am committed to contributing effectively to a dynamic team while continuing to grow professionally in the field of web development.

🎓 Education

Major: Information Systems , University of Information Technology - UIT

September 2022 — September 2026

📁 Project

Kicks - E-commerce Shoe Store (Team Project - Frontend)

October 2024 — December 2024

[Repo github](#)

Description: An e-commerce website for a shoe store, enabling customers to browse and purchase products online.

Responsibilities:

I was responsible for most of the front-end work, implementing the majority of the key features needed for an e-commerce website, such as:

- **Product Catalog:** Implementing a dynamic and responsive product listing with advanced filtering and search options.
- **Shopping Cart:** Developing a smooth and intuitive shopping cart system with real-time updates and checkout functionality.
- **Payment Gateway Integration:** Ensuring secure and seamless payment integration with services like PayPal or Stripe.
- **User Authentication:** Creating a secure user login and registration system, including password recovery and email verification.

Technologies Used:

React, TailwindCSS, Axios, Laravel, MySQL, Redis, JWT, WebSockets.

QR Food Ordering System (Team Project - Frontend)

January 2025 — April 2025

[Repo github](#)

Description: Created a seamless QR code menu system where customers can easily scan to browse the menu, place orders, and make payments. The system improves operational efficiency and enhances the customer dining experience.

Technologies Used:

Next.js, TypeScript, TailwindCSS, ShadCn, Zustand, Tanstack Query, SQL Lite, Fasify, Prisma, JWT, WebSockets.

Contact
